- [Note] 1 "General Entrance Examinations" includes examinations held at National Center Test for university admissions.
- 2 Record adults, international students, and returnee students together in "Other." However, if a recommendation based entrance examination other than the above is done, a column should be added for "Other Recommendation Entrance Examination." If there is a considerable (1/10 or greater) number of students enrolling through a different form of entrance examination, create a different column instead of including these students in the "Other" column. Delete columns for entrance examination methods which are not relevant.
- 3 Create a table for each semester when a semester based system is used which assumes multiple enrollment periods such as fall semester enrollment.
- 4 When a school comprises multiple departments create a "School Total" column and a "Subtotal" column for each department which records totals for applicants, students passing examinations, enrollees and the admissions quota. When departments have multiple courses and the admissions quota is set for each course, create a table for each course. In a university with multiple schools, create a "University Total" column and enter data similar with the "School Total."
- * When the admissions quota is an unspecified small number, "0" is entered.

[Note: KG] Since 2010, Recommendation by Attached School and Designated School Recommendation have been handled together and are entered together in the Designated School Recommendation column. (2011. 4)
Research materials included the "Kwansei University Master Statistics Compendium 2011."
