- [Note: KG] 1. The internal recurring research funding for undergraduate and graduate schools must equal column (A) in Table 29 and the overall total for Table 30.  
2. The total amount should match the total for undergraduate and graduate schools of internal joint research funding on Table 31.  
3. The amount of scientific research grants from external sources should match the total of (A) in Table 34.  
4. External research funding other than the above three categories should match the total of (B) in Table 34.
