- [Note] 1. Enter this data for all faculty offices possessed by undergraduate and graduate schools in the "Rooms" and "Total Area" columns.
 2. Calculate the "Average Area per Room" for all faculty offices and calculate the "Average Area per Instructor" for faculty offices actually in use by full-time instructors in undergraduate and graduate schools.
 3. When calculating the "Ratio of Private Rooms", if the number of private rooms exceeds the number of full-time instructors, in principle, enter 100%.
 4. Enter the number of instructors that do not have a private room in the "Note" column.
 5. Do not include assistant instructors in the number of full-time instructors.

[Note: KG] Private Room (A) includes 2 person rooms (Seven rooms in the Media and Research Facilities Building and eight rooms in Shared Facilities Building). Expert instructors use the 2 person rooms.
